

ELECTRO WIRE™

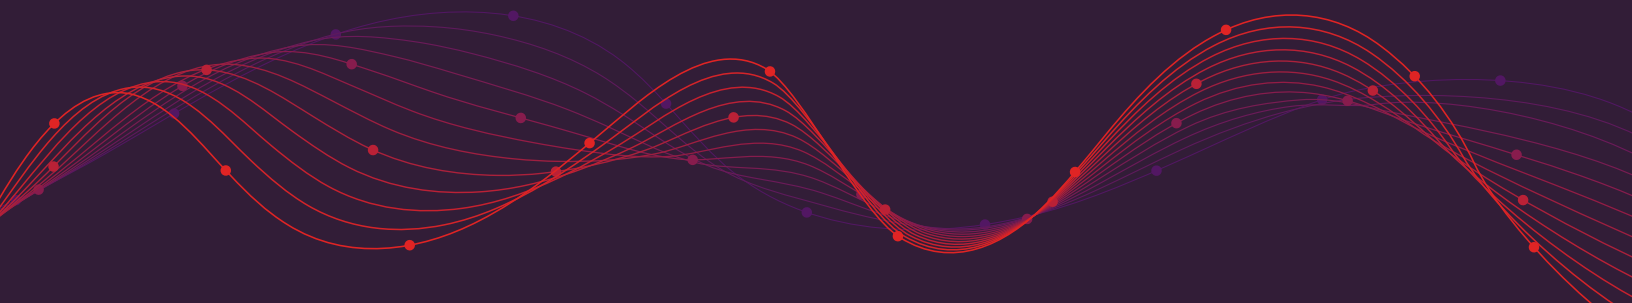

TELECOM SOLUTIONS

A GCG COMPANY

ELECTRO WIRE TELECOM SOLUTIONS

Engineered connectivity. Delivered with certainty.

Operating as an extension of your team, we actively remove uncertainty — aligning design, materials and delivery so that your infrastructure performs the way it was meant to, from day one.

ELECTRO  WIRE™

TELECOM SOLUTIONS

A GCG COMPANY

Certainty isn't just what we deliver; it's how we operate.

Our promise is simple: we make your work easier, your decisions clearer and your outcomes more predictable. Count on us for reliable wire, cable and connectivity solutions built to perform in real world conditions — and a team that shows up with the urgency, clarity and hands-on support your projects demand. When the stakes are high, we're the steady hand that keeps everything moving.

Comprehensive solutions. Calibrated for real-world conditions.

Electro Wire supports the full scope of telecom and broadband infrastructure through top-tier partnerships, white-glove service and disciplined execution. We are proud to be the longest tenured distributor of Southwire® TelcoFlex® — a partnership that spans over 30 years.

Telecom Infrastructure

Fiber, copper, power and connectivity solutions engineered for reliability across central offices, datacom environments and network builds.

OSP / ISP Solutions

Complete Outside Plant and Inside Plant offerings — including fiber (loose tube, ribbon and drop), PON cabinets, pedestals, handholes, connectivity and accessories.

Wireless & Small Cell Networks

Scalable solutions for 5G, DAS and in-building connectivity — from macrocell to microcell deployments, including fiber, coax, power systems and supporting infrastructure.

Products you can rely on. Partners you can trust.

We source and supply materials from manufacturers recognized for consistent performance in critical environments. Every solution we provide has been selected with field reliability and long-term performance in mind.

Our core categories include:

- Cable & Connectivity
- Power & Grounding
- Hardware & Enclosures
- Underground Infrastructure
- Tools & Installation Support
- Wire & Cable Management

Experience the Electro Wire difference.

With every engagement, our mission remains the same — remove complexity, anticipate needs and keep your builds moving with confidence.

01

Integrated into your business.

We operate as an extension of your team — aligned to your workflows, challenges and goals.

02

Responsive by design.

Fast answers. Fast solutions.
No delays when decisions need to be made.

03

Dependable execution.

We show up, follow through and keep projects moving without surprises.

04

Built to support your full operation.

From planning through procurement and delivery, everything stays on track.

05

Field-aligned support.

Services tailored to match the urgency and precision of your field teams.

06

Relationship-driven.

Trust is at the core of how we work.

07

Supply chain stability.

Strong supplier networks and nationwide distribution ensure materials arrive when needed.

08

Certainty in complex environments.

Logistics, OEM requirements, shifting timelines — we navigate it all with clarity and control.

Our value-added services.

Your operational strength.

When timelines are tight and expectations are high, networks don't get second chances. Tap into value-added services designed to remove friction from planning to installation — reducing labor, minimizing errors and accelerating deployment.

Technical & Design Support

Early-stage collaboration, application-driven product recommendations and engineering assistance to simplify complexity and control cost.

Kitting & Customization

Pre-configured kits, custom cutting, labeling and packaging — delivered jobsite-ready so crews can execute efficiently and accurately.

Inventory & Logistics Management

Strategic inventory positioning, phased deliveries aligned to build schedules plus dedicated project coordination to keep work moving.

Assembly Expertise

Our facilities support low- to high-volume production, prototyping, engineered cable solutions and PPAP quality processes, giving you confidence that what's specified is what performs.

Nationwide distribution.

Execution-ready.

With strategically situated warehouses across North America and dedicated assembly facilities in Leominster, MA; Columbus, NE; and Silao, MX, we ensure materials are delivered ready when you need them, aligned with your schedule. Our distribution network is built to support speed, accuracy and consistency across your projects — wherever they're deployed.

Note: GCG operates through cable and wire distribution, connectivity and engineered solutions, as well as international warehouse and 3PL locations.

We simplify the work behind the work.

Integrators / Network Engineers

Get networks that perform as designed — with precise, spec-aligned solutions that eliminate guesswork and reduce deployment risk.

Contractors & Installers

Keep projects moving with field-ready solutions that install right the first time — no rework, no surprises.

OEMs

Gain a more predictable supply chain with engineered, repeatable solutions that scale with production and perform in the field.

Carriers & Providers

Run your network on infrastructure built for long-term performance — supported end-to-end to ensure consistent network reliability.

Data Centers & Network Teams

Maintain uptime and scale with confidence using high-performance infrastructure solutions built for demanding environments.

Electro Wire Telecom Solutions was built on a simple premise. When the connection matters, the details matter more.

Engage us early to source the materials that meet your specifications, streamline procurement and reduce risk across your build. The sooner we're involved, the more certainty we can deliver.
