

Connecting and Powering the Future of Energy.

**Delivering Confidence
Across a Growing Landscape**

Paige[®]

ENERGY SOLUTIONS

A GCG COMPANY

One Energy Partner. From Grid to Generation.

At Paige Energy, we don't just deliver products. We help customers execute critical energy projects with greater efficiency, reliability, and confidence. Whether you're modernizing the grid, expanding distribution infrastructure, building solar generation, or deploying battery storage, our team helps reduce complexity and keep projects moving.

Engineering Expertise

Our in-house renewable energy experts guide you from concept From design review and value engineering to custom assemblies and technical support, we help identify opportunities to improve performance and reduce installation costs.

Solutions Built for Execution

Our engineered assemblies, custom harnesses, IPCs, and utility products help simplify installation and reduce labor in the field.

Supply Chain Confidence

Extensive inventory, nationwide distribution, and coordinated logistics help ensure the right products arrive where and when they're needed.

Partnership Beyond the Purchase

From project kickoff through commissioning, our team remains engaged to help customers solve challenges and keep projects moving forward.

Trusted Across Energy Infrastructure Applications

Utility Infrastructure

Overhead Conductors • Underground Power & URD • Communication & Control

- Strengthen grid reliability from transmission through distribution.
- Reduce installation complexity in underground and overhead systems.
- Improve safety and operational flexibility with utility-focused solutions.

Renewable Energy

PV Cable • PaigeX • Load Break Disconnect • Medium-Voltage Cabling

- Reduce labor and accelerate project schedules.
- Simplify installation with engineered assemblies and integrated solutions.
- Maximize long-term system performance.

Energy Storage

BESS Connectivity • Communications Infrastructure

- Support reliable energy delivery when and where it's needed.
- Integrate storage systems with confidence.
- Improve resiliency across modern energy networks

Can Deliver for Your Next Project**

Custom Assembly & Value-Added Services

Engineering Support:

Personal design review, AutoCAD/Blue Beam deliverables, and value engineering to reduce costs and material waste.

Kitting & Logistics:

Custom kits, pre-packaged and labeled for each site quadrant, enable faster, safer installs and reduce errors.

Project Coordination:

Strategic shipping and delivery mapped to your schedule and preferences, with support from project start to finish.

DC String Harness Integration Assemblies

Custom configurations of combined solar panel strings to optimize copper use across project sites ensuring maximum efficiency and minimal material costs.

Powered by Expertise. Building Tomorrow Together.

With over 80 years of combined experience, Paige Energy Solutions delivers proven solutions and strategic guidance for complex projects. Partner with us to transform vision into reality and lead the future of energy.
