

Engineering Tough, Reliable Cable Systems for U.S. Ports

Backed by Over 65 Years of Expertise

Specializing in high-speed crane cables, power, and data solutions designed to withstand extreme temperatures, UV exposure, and the wear-and-tear of constant motion, plus our unmatched commitment to durability makes Paige a partner you can trust.

Why Paige OEM Solutions

- ⚡ Fair, competitive pricing and a wide range of crane, power and data cable inventory
- ⚡ No order minimums, so you can get exactly what you need – and nothing that you don't
- ⚡ Less required lead time so you don't have to adjust your timeline
- ⚡ Responsive customer service and support through every step of your project

Made to withstand the elements

- ⚡ Extreme Temperatures
- ⚡ Oil and Chemical Resistant
- ⚡ UV-Sunlight Resistant
- ⚡ Constant, rigorous movements from the reel drum and festoon

Prevent Cable Damage with the Toughest Products on the market

- ⚡ Conductor insulations that improve mechanical stability and the lubricity of the inner conductors against each other, reducing the likelihood of binding and mechanical stress
- ⚡ Our cable jacket materials, which enhance tear and elongation properties, are designed and tested for longer life

Our expertise makes for the best customer experience

Knowledgeable engineers and salespeople able to evaluate your cabling needs and make recommendations for your port

Plenty of inventory to meet your product needs

High speed crane cables

Sundry items

Power and Control Cables

Data and Communication Cables
