Submersible Pump Cables

From Paige[®] Water & Outdoor

Performance under pressure

Our expertise runs as deep as the wells you're pumping - and just like you - our products are built to stand up to the pressure.

Our engineers understand the challenging conditions that threaten your business and are dedicated to providing comprehensive products that can stand up to anything in their path.

What you get when you work with our team

- ⚡ Access to submersible pump cable specialists who are experts in their field
 - ⚡ Flexible solutions that are designed and manufactured to meet your needs
 - ⚡ Value-added assemblies and custom overmolded products
 - ⚡ Stocking programs with fast, same-day shipping
 - ⚡ Hard-to-find and specialty cables
 - ⚡ Splice kits for transition or cable repair
- 

Looking for the largest stock selection of submersible pump cables?

You've come to the right place.

Paige provides submersible cable used in wastewater, dewatering, potable well water, and oil, gas and mining applications. We offer a complete spectrum of cable, assemblies and accessory needs with coast-to-coast distribution.

- ⚡ Numerous sizes: 14 AWG - 1111 MCM
- ⚡ Flat and Round
- ⚡ Armored and Unarmored
- ⚡ Rubber and Plastic
- ⚡ 600V and Medium Voltage
- ⚡ Methane, Fracking, Offshore, and Underground

We're NSF certified

Our products aren't just high quality, they're safe and effective to put in potable water.

It's time for your business to thrive

Our team has the focus, dedication, and experience to handle any submersible cable request, large or small, customized special order, or standard stock. Let's talk about how we can solve your toughest problems.
